

Work —

Web Design & Development Intern

IBM

Jun 2015 - Aug 2016 | Beijing, China

Designed the dashboard for IBM LinuxONE Community Cloud Service. Redesigned and implemented the website for IBM's CDUG conference. Advocated usability and aesthetics as the only designer in the team.

App Operation Intern

Bri Experience Technology

Mar 2014 - Aug 2014 | Beijing, China

Maintained a new wallpaper app for 2 months. Visualized the user's data based on emotional indications and wallpaper colors. Improved app's content strategy. The number of active users increased by one million.

Projects —

Comake

Group Communication Tool

Feb 2017 - Present | Main Designer, Project Lead

Leading a team of 6 to help a Cornell startup to develop Comake, a collaborative cloud storage tool focusing on the network between files instead of the traditional folder structure. Responsibilities include chat functionality and integration with Slack using Ruby on Rails.

FitCat 2.0

iOS Application to Help Cats Lose Weight

Aug 2016 - Present | Main Designer | Best MPS Project

Led the decision of redesigning the information architecture of FitCat 1.0. Used metaphors to help non-tech users understand the app better. Currently under development and sponsored by Cornell Feline Center.

WITUS

Web-based Solution for Job Hunting

Aug 2016 - Dec 2016 | Main Designer

Led the design of a Pinterest-like browser extension to solve international students' inconvenience of going back and forth to check work authorization information while viewing job postings online. Users are able to pin jobs to our job management tool through the plugin.
