

## Work —

### Web Design & Development Intern **IBM**

*Jun, 2015 - Aug, 2016 | Beijing, China*

Designed the dashboard for IBM LinuxONE Community Cloud Service. Redesigned and implemented the website for IBM's CDUG conference. Advocated usability and aesthetics as the only designer in the team.

### App Operation Intern **Bri Experience Technology**

*Mar, 2014 - Aug, 2014 | Beijing, China*

Maintained a new wallpaper app for 2 months. Visualized the user's data based on emotional indications and wallpaper colors. Improved app's content strategy. The number of active users increased by one million.

## Projects —

### Comake **Group Communication Tool**

*Feb, 2017 - Present | Main Designer, Project Lead*

Leading a team of 6 to help a Cornell startup to develop Comake, a group communication tool focusing on how people design and make decisions during a project. Responsibilities include chat functionality and integration with Slack.

### FitCat 2.0 **iOS Application to Help Cats Lose Weight**

*Aug, 2016 - Present | Main Designer | Best MPS Project*

Led the decision of redesigning the information architecture of FitCat 1.0. Used metaphors to help non-tech users understand the app better. Currently under development and sponsored by Cornell Feline Center.

### WITUS **Web-based Solution for Job Hunting**

*Aug, 2016 - Dec, 2016 | Main Designer*

Led the design of a Pinterest-like browser extension to solve international students' inconvenience of going back and forth to check work authorization information while viewing job postings online. Users are able to pin jobs to our job management tool through the plugin.
